

DATA STRUCTURES

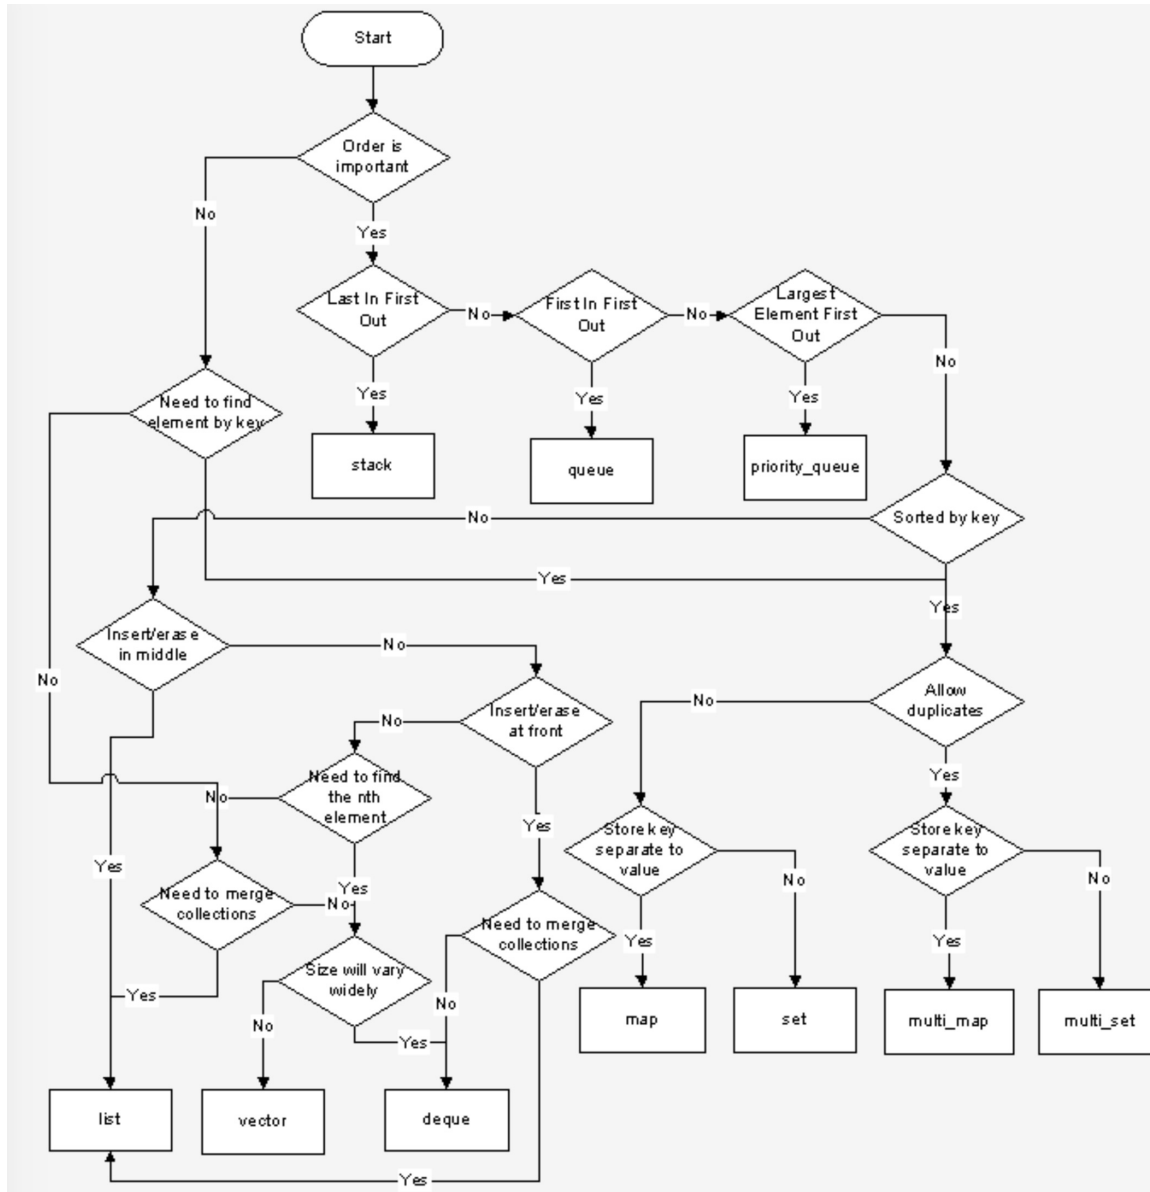

Vectors

- `std::vector` is a sequence container that encapsulates dynamic sized arrays*

*<https://en.cppreference.com/w/cpp/container/vector>

Data Structure Decision Diagram

- The following diagram gives you the direction to which data structure to use in C++ according to the problem you are trying to solve

Note: I don't have the source of this diagram. If you know it, please drop me a msg so I can add it here.
