GRAPH (BFS)

https://leetcode.com/problems/maximum-level-sum-of-a-binary-tree

Problem Statement

- Given the root of a binary tree, find the smallest level with the maximum sum
- For example, the tree below has the follow sums for each level:

level
$$1 \text{ (root)} = 1$$

level
$$2 = 7 + 0 = 7$$

$$|eve| 3 = 7 - 8 = -1$$

Therefore, level 2 has the maximum sum

Solution – Maximum Level Sum of a Binary Tree

https://leetcode.com/problems/maximum-level-sum-of-a-binary-tree

Solution

- Have a queue with the nodes for the current level
- Sum the values from that level by taking the nodes from the queue
- Example, we know that level 1 has one node. Hence, pop the first node from the queue
 If level 2 has 2 nodes, pop two nodes, sum the values
- In addition, add left and right to the end of the queue to process the next level

Code – Maximum Level Sum of a Binary Tree

E LeetCode

https://leetcode.com/problems/maximum-level-sum-of-a-binary-tree

```
int maxLevelSum(TreeNode* root) {
 std::queue<TreeNode*> nodes;
 int currentLevel = 0;
 int maxLevel = 1;
 int maxSum = INT MIN;
 nodes.push(root);
 // traverse the graph
 while(!nodes.empty()) {
     int levelSum = 0;
     int levelSize = nodes.size();
     currentLevel++;
     // sum the values in current level
     for (int i = 0; i < levelSize; ++i) {</pre>
         TreeNode* node = nodes.front();
         levelSum += node->val;
         nodes.pop();
         if (node->left) nodes.push(node->left);
         if (node->right) nodes.push(node->right);
     if (levelSum > maxSum) {
         maxLevel = currentLevel;
         maxSum = levelSum;
 return maxLevel;
```
